ABOUT

I'm a graphic designer with a strong focus on turning ideas into visual worlds. My work moves between brand identity, packaging, editorial and presentation design, with a particular focus on imagery, composition, colour and the feeling a design creates. I started my career in Switzerland and Germany, working in graphic design and advertising agencies before moving into freelance design. Over the following years, I continued working independently while travelling and living across Europe, Central America and Southeast Asia with my family. Today, I bring both parts of that experience with me: a trained eye for design and a broader perspective shaped by living across different environments and cultures.
